The London Alternative

186k
Limited

186k Limited The Centre of Data (not the centre of London)

The location of the **186k** data centre makes it an attractive proposition in itself. Access from motorways and public transport is freely available and just minutes away.

186k data centre is connected to the internet via 2 x 100MB links to London, making it an cost effective alternative to expensive hosting within the capital.

186k data centre has the latest fire suppression from TYCO and dedicated backup services through UPS and generator. The site is totally white labelled which delivers our Partners request to resell space as their own collocation facility.

With dedicated support on hand the **186k** Leeds Data centre means that clients can rest assured that your hardware is fully supported 24/7.
