

Number Services/VoIP

198.168.20.1//24.7.365.186k//011.333.20.922
Not an IP address...but it is what we do!!

Q) How much extra profit could these additional services create?

A) The opportunities are vast but we think you could be talking TELEPHONE NUMBERS!!

Opportunities for additional revenues and Margins don't come along all that often. More to the point an opportunity only becomes reality if you can capture it?

One such opportunity is that of VoIP technology. Previous attempts by the industry to make VoIP the standard platform have been un-successful.

However **186k Limited** believes that with the introduction of the new 21cn platform harnessed with our unique number service offerings we are now in a position to deliver an "opportunity you can capture"

Faster transfer speeds and quality of service from **186k Limited** has now enabled the backbone for this technology to become the standard, bringing with it all the benefits it has to offer.

186k Limited has in recent years invested heavily in our own exchange which ensures we can deliver quality of services every step of the way. Coupled with our unique virtual office and Number Services, it is difficult to see how extra Margin could not be generated.

186k Limited Benefits and features...
